Excited and Eager to Learn:
Python
Django
AWS
Docker
Kubernetes
React Native
.NET
PHP
Mocha

## ○ HOBBIES ○

Writing, Reading, Music,
Philosophy, Comedy, Meditation,
Gaming

## 💼 EMPLOYMENT HISTORY

### Software Engineer at Firecon - Contracted

2018

- Design company applications with React focusing on delivering an intuitive, beautiful, and reliable user experience
- Moderate 10,000s of dollars of customer payment through expedient AWS Lambda functions utilizing Stripe's secure processing tools
- Optimize for speed and consistency with GatsbyJS and Netlify for maximum retention of users
- Maintain effective, honest, and timely communication with client to meet their needs

### Software Engineering Instructor at Hack Reactor

2018

- Mentored and taught students how to build web applications across the stack, focusing on React, Node.js, and SQL
- Guided group projects in their design, system architecture, implementation, and deployment, as well as group dynamics and agile workflows
- Provided 1-1 tutoring over problem solving patterns and full-stack development
- Facilitated technical interviews with prospective students for admission into the program

### Full-Stack Engineer at MyMedia - Personal Application

2018

- Architected system design for managing 1,000s of user-data relationships across the stack with Vue, Node.js, and PostgreSQL
- Designed and implemented a robust and expedient database architecture to generate unique user recommendations from user data
- Integrated RESTful API connections to translate hundreds of user provided recommendations into decipherable graphs using Chart.js

### English Teacher at Westlake High School

2014 – 2018

- Taught young people the wonder of reading and writing with joy, compassion, and encouragement
- Led teams of teachers and interns on developing curriculum to best reach struggling and disinterested students
- Collaborated with teachers, parents, and students to promote mindfulness and fight mental health stigmatization

## 🎓 EDUCATION

### Hack Reactor at Austin - Advanced Software Engineering Immersive

2018

### University of Texas at Austin

2011 – 2014

**Degree: Bachelor of Arts in Literature**
